12 JULY - 2021

**NATIONAL PAPER
BAG DAY**

- Eco - friendly
- Easily recyclable
- Bio de-gradable
- Inexpensive

No Doubt using paper bags will help a lot to the environment.

But yes we should not waste paper or should not over do it.

Date: 12/07/2021

Dear Teachers and Students,

Paper Bag Day is celebrated on 12 July annually to make people aware of the pollution caused due to plastic and the serious threat that it poses to the natural environment. Plastic waste takes thousands of years to decompose. Therefore, it is important to understand the ill effects of single- use plastic bags.

Paper bags are made from renewable raw materials, are recyclable and biodegradable. No doubt they are strong and are used on almost all occasions. Several people are using bags every day made up of paper that help in curbing environmental pollution. Due to globalization, climate change and scarcity of raw materials people are adopting sustainable lifestyle choices and paper bag is one of them. It reduces the use of plastic bag which causes pollution and are non-biodegradable. To magnify the importance of this day you are requested to make your own kind of paper bags creatively. Please send a clear picture of the same along with your photo to your respective class teachers before 5:00 PM today and When you come to school submit the 'paper bag' to your respective class teacher.

Thanking you,

Rachana C Swamy & Jyothi P
Eco Club Co-ordinators
