'Someone is sitting in the shade today because someone planted a tree a long ago'

Dear Students,

As we can see, humans, animals and the environment depend upon trees for survival. Therefore, as deforestation continues, we must put back what we're taking away. By planting more trees, it will contribute to global reforestation efforts, restoring lost forests, repairing damaged ecosystems and mitigating climate changes.

Our School is conducting '**One Child, One Plant Drive'** on **21/08/2021**. All students are requested do the following activities compulsorily.

Step 1:

- Plant at least one sapling (young tree).
- Wear green dress while planting.
- Unique slogan either in Kannada or English to be said while planting.
- Each one should take pledge to protect plant.
- Make a video of these above mentioned activity.
- Send a photo of planted sapling along with you.

Step 2:

- Nourish the sapling and take care of it.
- To know the plant condition you have to send the photo of the sapling every Saturday till 18/09/2021.
- Finally you have to collage all the photos to know the sapling growth and send it in the group.
- Based on how you will take care and nourish the saplings you will get reward.

Trees contribute to their environment by providing oxygen, improving air quality, climate amelioration, conserving water, preserving soil. Many people plant trees as living memorials of life-changing events. Trees help record the history of your family as they grow and develop alongside you and your kids. We often make an emotional connection with trees we plant or become personally attached to the ones that we see every day. These strong bonds are evidenced by hundreds of group.
